

**A
Project Report
On
"Hotel Software Cloud UI/UX"**

(IT447 - Software Project Major)

Prepared by
Foram Bhut (18DIT005)
Palan Khimani (18DIT026)
Mijoli Mehta (18DIT035)
Vaidehi Patel (18DIT059)

Under the Supervision of
Prof. Rajesh Patel
Prof. Radhika Patel

Submitted to

Charotar University of Science & Technology (CHARUSAT)
for the Partial Fulfillment of the Requirements for the
Degree of Bachelor of Technology (B.Tech.)
in Information Technology (IT)
for 8th semester B.Tech.

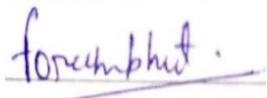

Submitted at

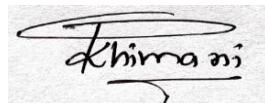

DEPARTMENT OF INFORMATION TECHNOLOGY
Devang Patel Institute of Advance Technology and Research (DEPSTAR)
Faculty of Technology & Engineering (FTE), CHARUSAT
At: Changa, Dist: Anand, Pin: 388421.
April, 2022

DECLARATION BY THE CANDIDATES

We hereby declare that the project report entitled "**Hotel Software Cloud UI/UX**" submitted by us to Devang Patel Institute of Advance Technology and Research, Changra in partial fulfilment of the requirement for the award of the degree of **B.Tech.** in Information Technology, from Department of Information Technology, DEPSTAR-FTE, CHARUSAT, is a record of bonafide IT447 Software Project Major (project work) carried out by us under the guidance of **Prof. Rajesh Patel & Prof. Radhika Patel**. We further declare that the work carried out and documented in this project report has not been submitted anywhere else either in part or in full and it is the original work, for the award of any other degree or diploma in this institute or any other institute or university.

COMPANY CERTIFICATE

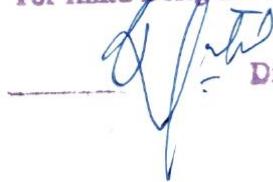

TO WHOMSOEVER IT MAY CONCERN

With reference to the above and the internship completion certificate dated **(18th April 2022)**, issued to **Miss Foram Bhut (18DIT005)**, Kintu Designs Pvt. Ltd. Hereby issues this certificate to **Foram Bhut** and duly certifies that she has successfully completed her Internship programme of 6 months. During this period **from 1st December, 2021 to 15th April, 2022**. She undertook a project titled "**Hotel Software Cloud UI/UX**" as partial fulfillment for the award of **B.Tech (Information Technology)** from **DEPSTAR, Charusat University**.

During her training period, we have found her to be dedicated and knowledgeable about the subject and her performance towards completion of the project has been satisfactory.

ABSTRACT

The main goal of the proposed system is to create a hotel management framework for use in a hotel. The system should be as adaptable as possible, allowing it to be used in a variety of hotels. To learn about the different features that hotels have used we need to figure out what protocols hotels uses and then build a design that allows those procedures to work smoothly. We looked up on how a hotel system functions on the internet, used our own knowledge and observed the people who are related to the hotel by using or providing services. As more varied our information sources were, the better resulting designing method it would be. This project aims to make record updating, maintenance and searching more user-friendly. The entire information has been stored in the database or archives and anyone who wishes to retrieve it will be unable to do so as the only administration department will be able to retrieve the information.

ACKNOWLEDGEMENT

In the period of internship, the work had been provided was “Hotel Software Cloud UI/UX”. The role was to create the appropriate UI/UX for the same using tools like Figma and HTML-CSS. With immense pleasure and commitment, we would like to present this project. The development of this project has given us wide opportunity to do brainstorming, implement the ideas, interact with group and think with various aspects as well as to explore about UI/UX.

Every work that one completes successfully stands on the constant encouragement, goodwill and support of the people around. Hereby we avail this opportunity to express our gratitude to number of people who extended their valuable time, full support and cooperation in developing the project and helping out with difficulties.

We would like to thank our team members and guides for their continuous support and providing us the necessary guidance in associate to this project. We would also like to thank our advisors and faculty members Prof. Rajesh Patel sir and Prof. Radhika Patel ma’am for guiding us.

We perceive as this opportunity as a big milestone in our career development. We will strive to use gained skills and knowledge in the best possible way.

CHAPTER 1: INTRODUCTION

1.1 PROJECT SUMMARY

Our Project is basically a Hotel Software in UI/UX. It is used by administrators, staff members and Users (Customers). All have to do sign up for the system and log in. The Users will be informed about of the availability of rooms in hotel and they can book the rooms as per their convenience from the available rooms. They can book rooms in advance based on their needs to make their stay more comfortable. Both online and offline reservation modes are available. It has the function of providing hospitality services to customers. Customers are easy to book their rooms. It also has hotel and restaurant features like book order, food menu and on the basis of that it will prepare the reports of reservations, banquets and point of sale.

In admin panel, admin can handle various parameters like add new rooms or amenities, details of expenses, food menu and kitchen stock as well as they can manage payment, staffs and details of guests & reservations.

1.2 PURPOSE

The purpose of this project is to provide more friendly and modern user interface comparatively to mostly are present in the market. Also, to keep the design simpler and more impactful with creativeness. It is easy to implement by scripting language and many more.

1.3 OBJECTIVE

The objective of the project is to design a prototype for the web app of a hotel software cloud that enables smooth flow of users from one screen to another. Create user flows and wireframes to ensure good user experience along with clean and modern UI.

CHAPTER 2: PROJECT MANAGEMENT

2.1 PROJECT PLANNING

2.1.1 Project Development Approach and Justification

We used the Agile model as a system to process information in order to create error free solutions. Agile model has 5 different stages: Requirements, Design, Develop, Test and Deploy.

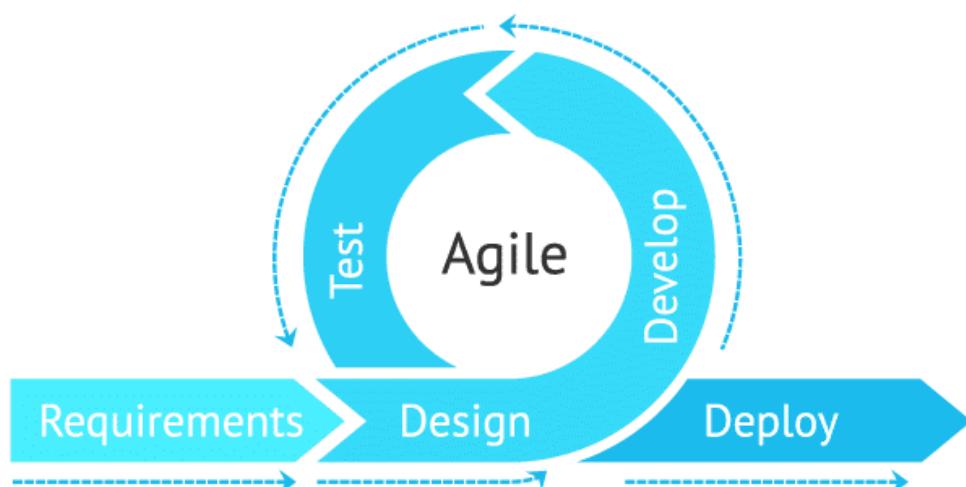

Fig 2.1 Agile Methodology

The very first stage of the agile methodology consists of learning more about project definition and their tools. We carried out market research and collected data along with the data provided from the company through previous performance reports and analysis. The Design stage of the agile represents a starting of the actual design process, the actual making of the wireframe design using scratch and lastly implement it with attractiveness. The next phase development involves a putting the designs together and perform prototyping which connect all the designs and run like a app. The testing stage includes the final testing of the website and if any mistake occurs then solve it with redesigning. Lastly launch the website.

2.1.2 Roles and Responsibilities

Fig 2.2 Individual Roles

2.2 PROJECT SCHEDULING

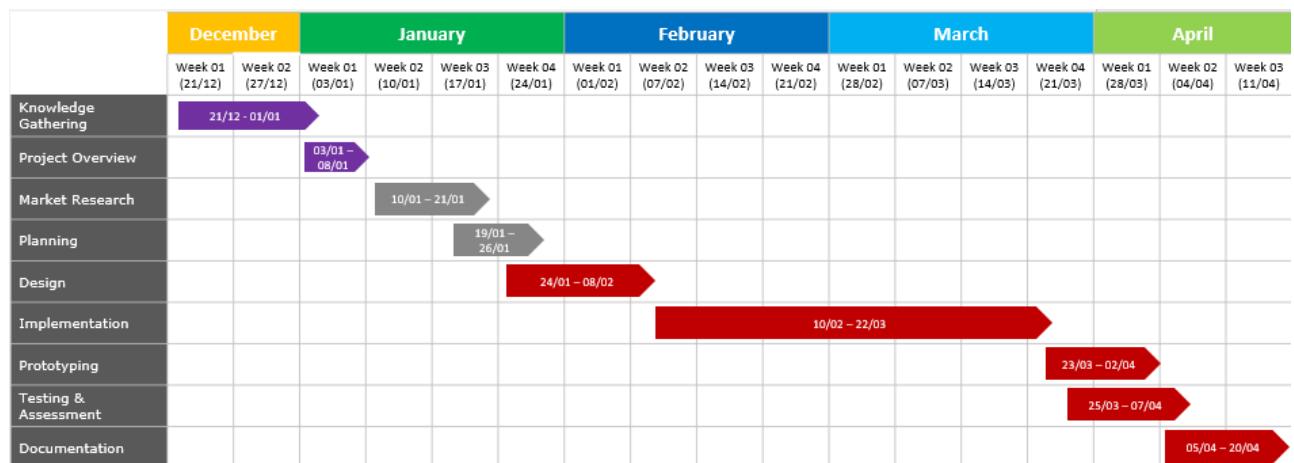

Fig 2.3 Gantt Chart

CHAPTER 3: SYSTEM REQUIREMENTS STUDY

3.1 USER CHARACTERISTICS

Administrator:

- This user has all the access and privileges to use the whole application.
- User can modify all the information and data can be managed by this level user.

Visitor User:

- They will not be able to update existing or insert any new information.
- They can only see services provided by our website.

3.2 HARDWARE AND SOFTWARE REQUIREMENT

3.2.1 Hardware Requirement

Any external hardware is not required for implementation. Normal configured Personal Computer can handle the website.

For Example:

Processor: Intel core i5-7200U 2.50GHz

RAM: 8.00 GB

Operating System: Windows / Mac / Linux

3.2.2 Software Requirement

1. Tool: Figma

Fig 3.1 Figma Logo

2. Browser: Any One

Fig 3.2 Browsers

CHAPTER 4: SYSTEM ANALYSIS

4.1 STUDY OF CURRENT SYSTEM

We studied various hotel management pages for the content of a Hotel Software Cloud. We found that the many sites lacked information regarding hotel culture, testimonials and food stocks. Also, the widgets on the page made the page slow which affected the performance of the website.

4.2 PROBLEM AND WEAKNESS OF CURRENT SYSTEM

The current system did not have all hotel function in one like room booking, banquet details and food items. Therefore, user have to find near place for functions & events. Also, more information was needed to be added. The UI of the page lacked with different colors which are attractive.

4.3 REQUIREMENTS OF NEW SYSTEM

4.3.1 Functional Requirements

- Make Reservations (Online, Offline)
- Search Rooms
- Payment Options
- Manage Guest (Add, Update)
- Manage Room (Add, Update, Delete)
- Manage Staff (Add, Update, Delete, View)
- Manage Inventory
- Manage Menu items
- Calendar (Add, Remove events)
- Functions & Events

4.3.2 Non Functional Requirements

- Availability
- Ease-of-use
- Performance

4.4 ACTIVITY DIAGRAM

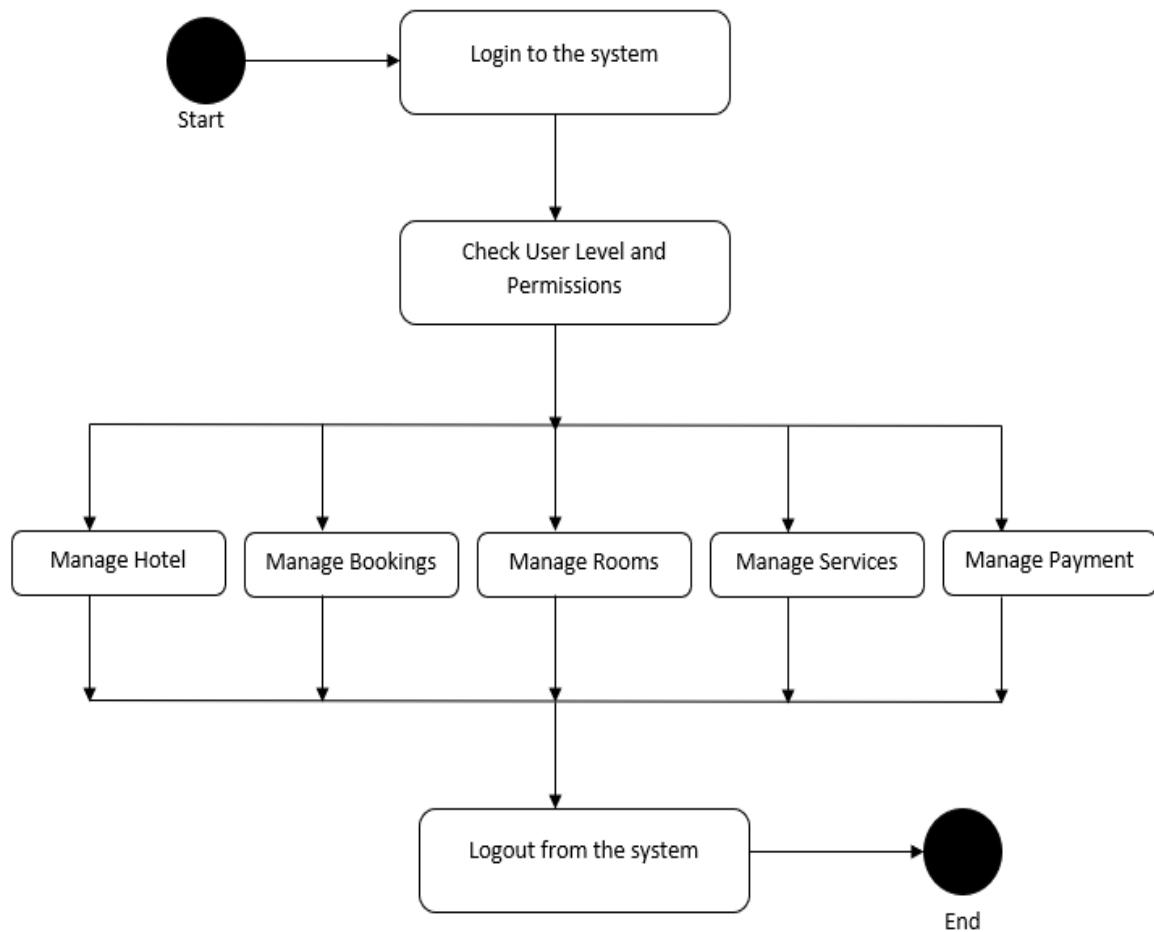

Fig 4.1 Activity diagram

4.5 USE CASE DIAGRAM

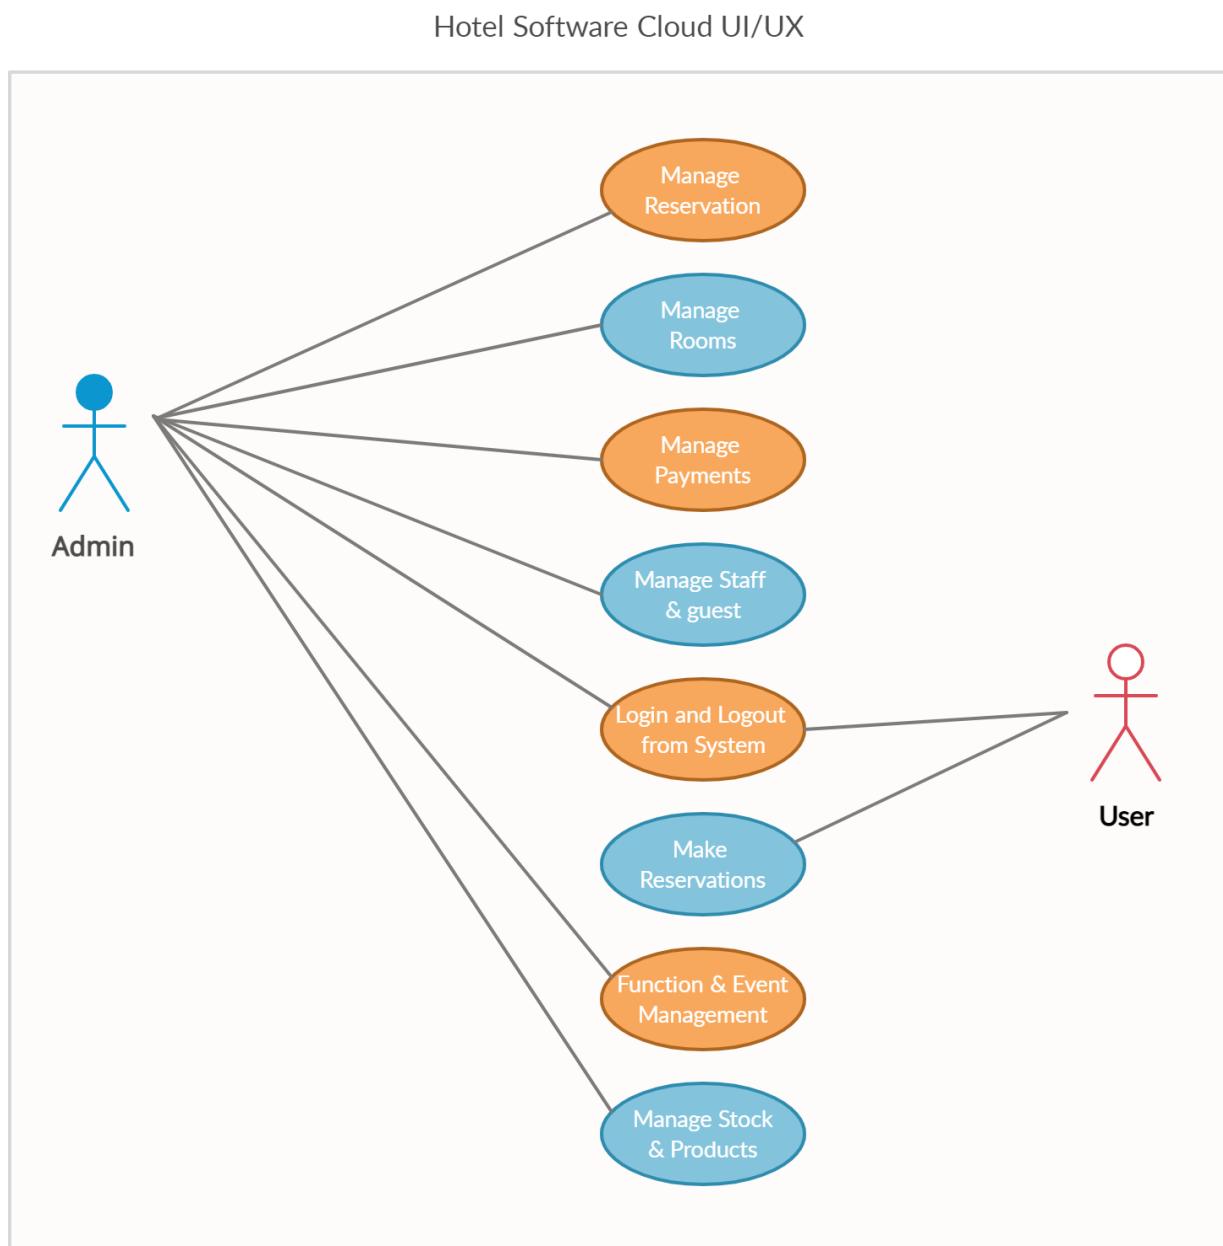

Fig 4.2 Use Case Diagram

4.6 SEQUENCE DIAGRAM

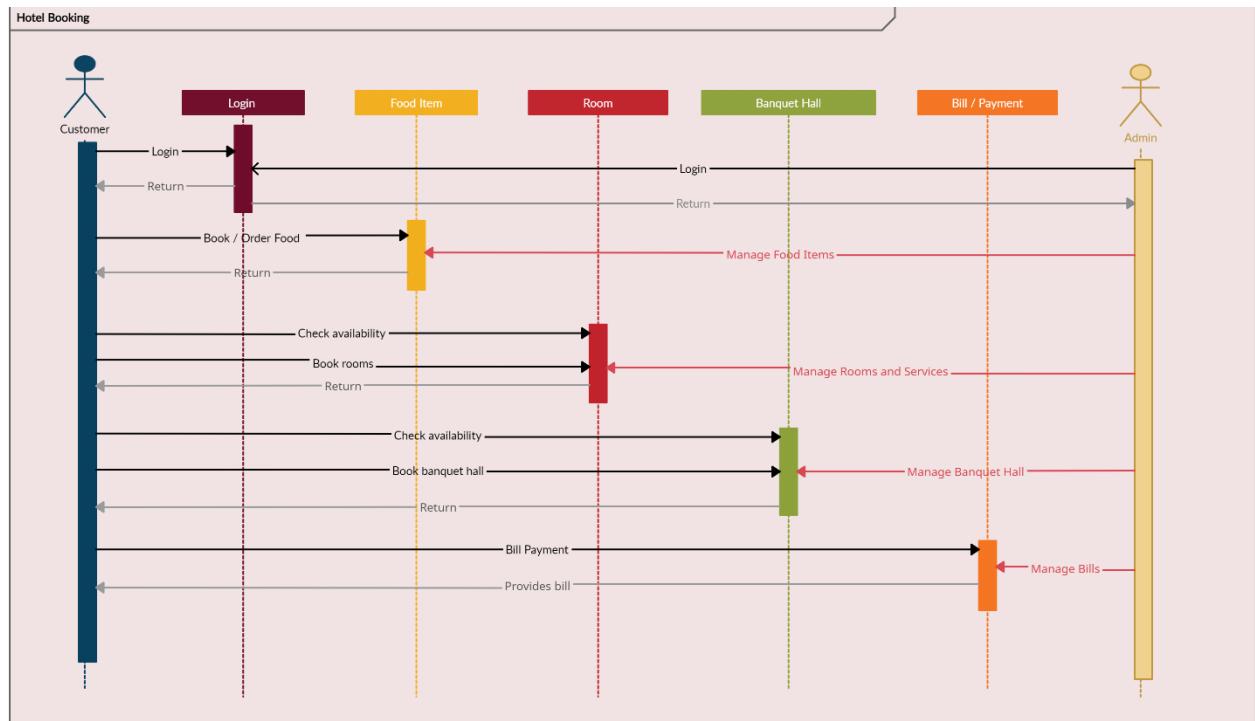

Fig 4.3 Sequence Diagram

CHAPTER 5: SYSTEM DESIGN

5.1 SITE MAP

A UX sitemap is a hierarchical diagram of a website or application that shows how pages are prioritized, linked and labeled.

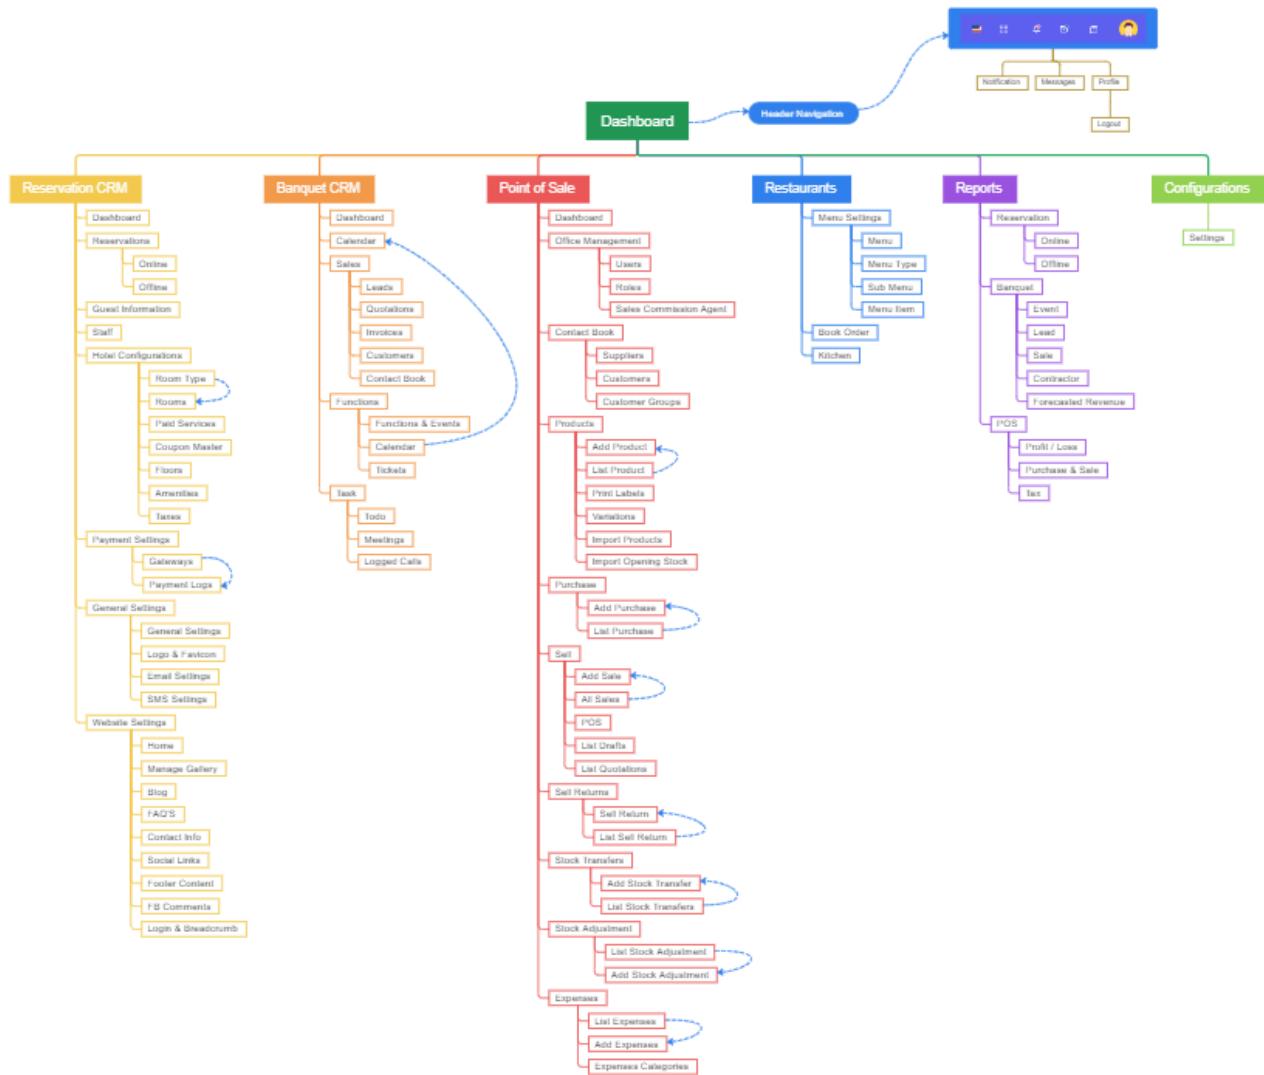

Fig 5.1 Site Map

CHAPTER 6: IMPLEMENTATION PLANNING

6.1 STYLE GUIDE

The image shows a digital style guide interface. At the top is a horizontal color palette with 18 squares in various colors: blue, orange, red, yellow, light orange, pink, green, lime green, cyan, magenta, white, black, dark grey, medium grey, light grey, and white again. Below this is a table for 'Color Styles':

Color Styles	BG	Blue
Heading	White	Green
Body Light	Accent	Dark Green
Body Dark	Orange	Dark Orange
Grey	Red	Dark Yellow
Border	Yellow	Purple
		Dark Red
		Pink

Below the color palette is a section for 'Text Styles' under a 'Body' heading. It lists font sizes and styles for various headings:

- H1**: 56/Auto (Regular)
- H2**: 48/Auto (Regular)
- H3**: 36/Auto (Regular)
- H4**: 28/Auto (Medium)
- H5**: 20/Auto (Regular)
- H6**: 18/Auto (Regular)

There is also a 'Link' heading with a font size of 14.

At the bottom is a section for 'Icons' showing a grid of 70 small, semi-transparent icons used for navigation and actions.

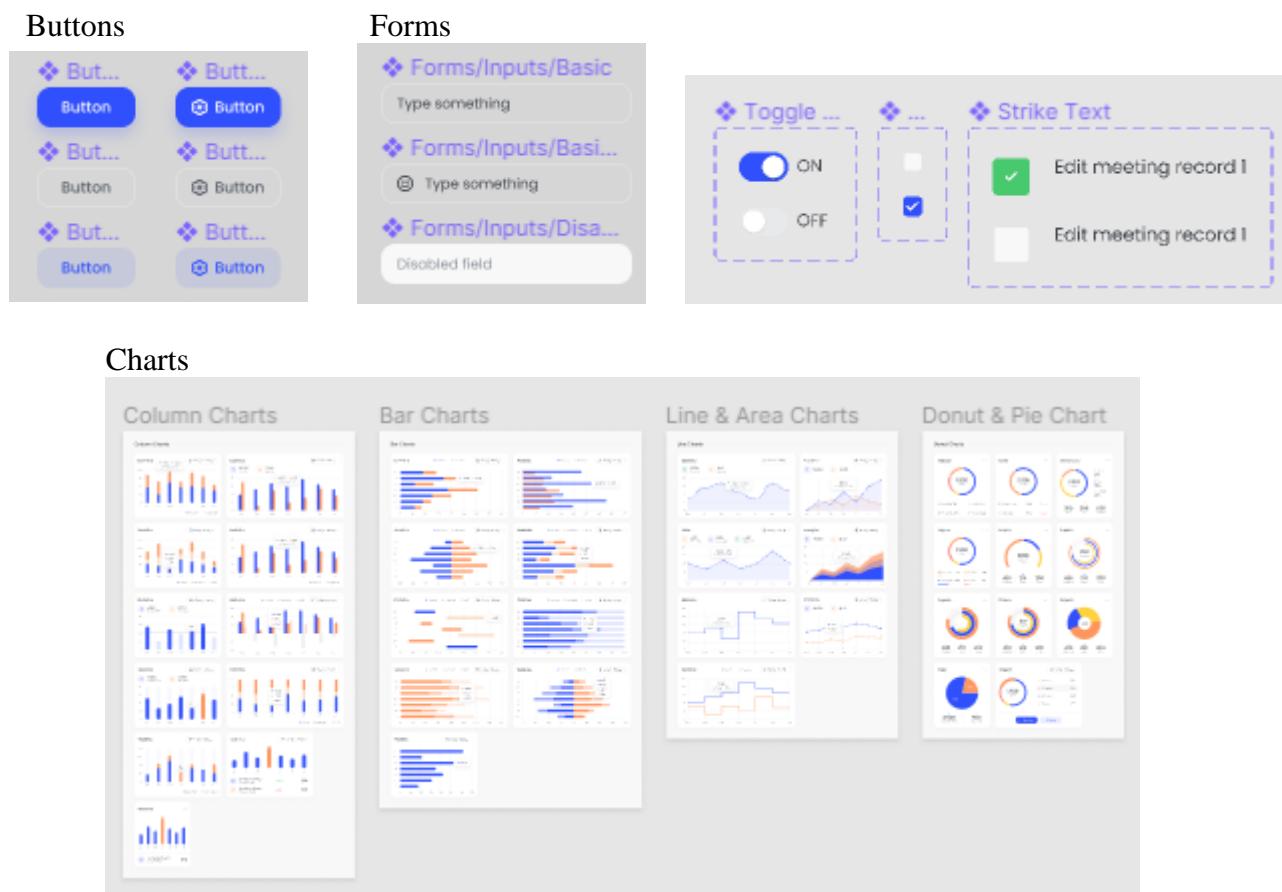

Fig 6.1 Styles

6.2 WEBSITE OUTPUT

We have created total 180 pages.

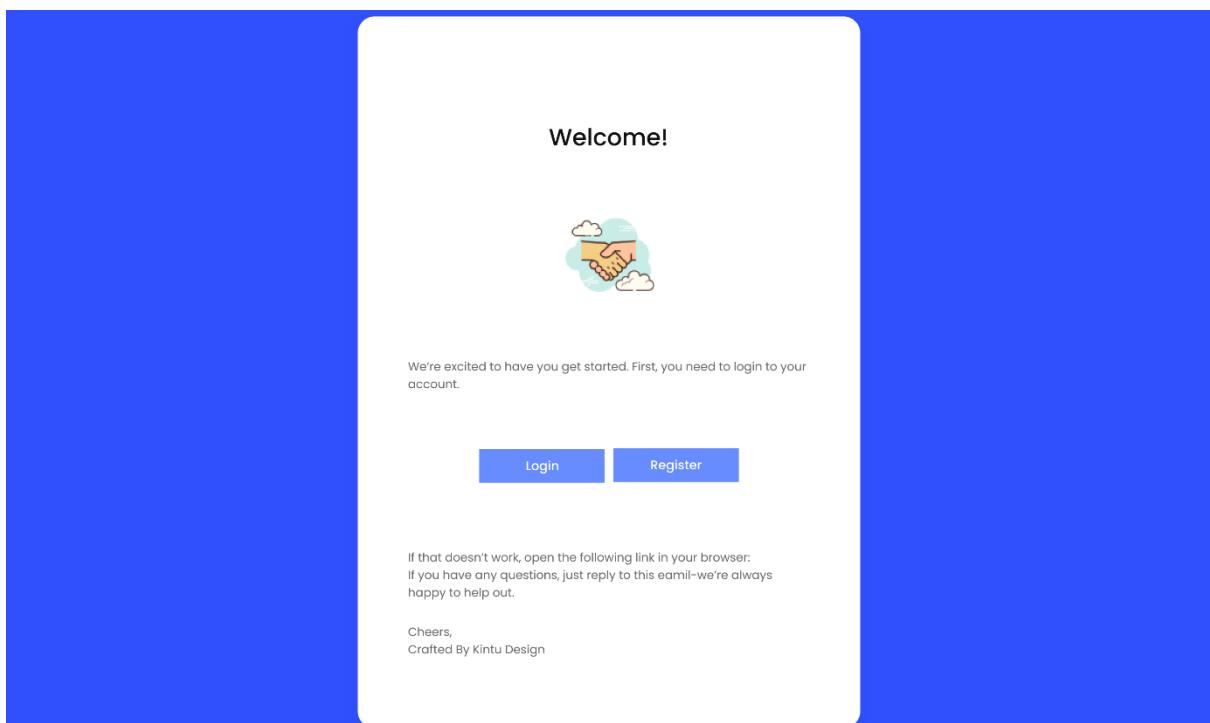

Fig 6.2 Welcome page

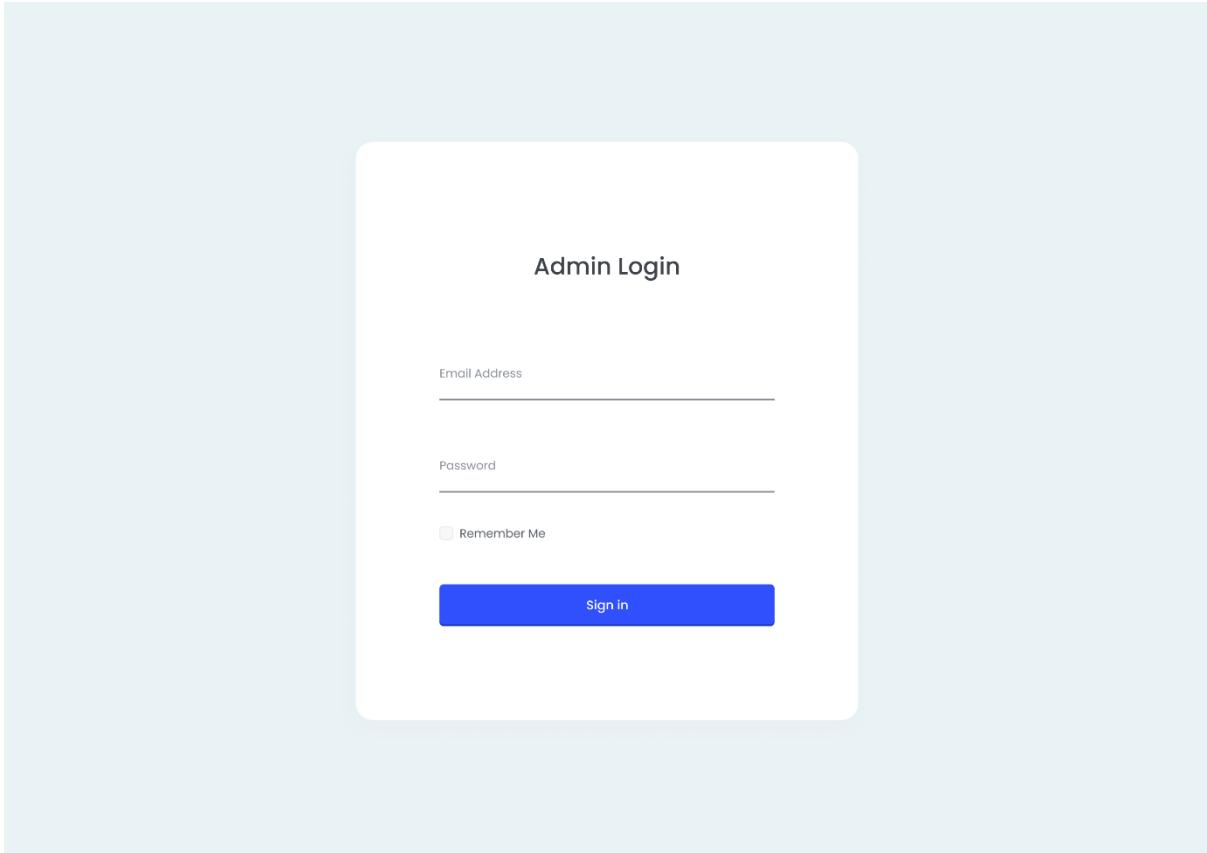

Fig 6.3 Login page

A screenshot of a Register Business page. The page has a light blue header and footer. The main content area is a white card with rounded corners. At the top center, it says "Register Business". Below that are two rows of input fields. The first row contains "First Name" and "Last Name". The second row contains "Email" and "Contact No. (Whatsapp)". The third row contains "Password" and "Confirm Password". The fourth row contains "Company Name" and "Business Type". The fifth row contains "Domain Name (Sub-Domain)" and "Address (Flat/House/Floor, Building)". The sixth row contains "Locality Area" and "Country". The seventh row contains "State" and "City". The eighth row contains "Pincode". At the bottom of the card is a large blue rectangular button with the white text "Register".

 - Monthly Reservation** (highlighted in blue)
- MONTHLY RESERVATION CHART:**

MONTHLY NEW BOOKING

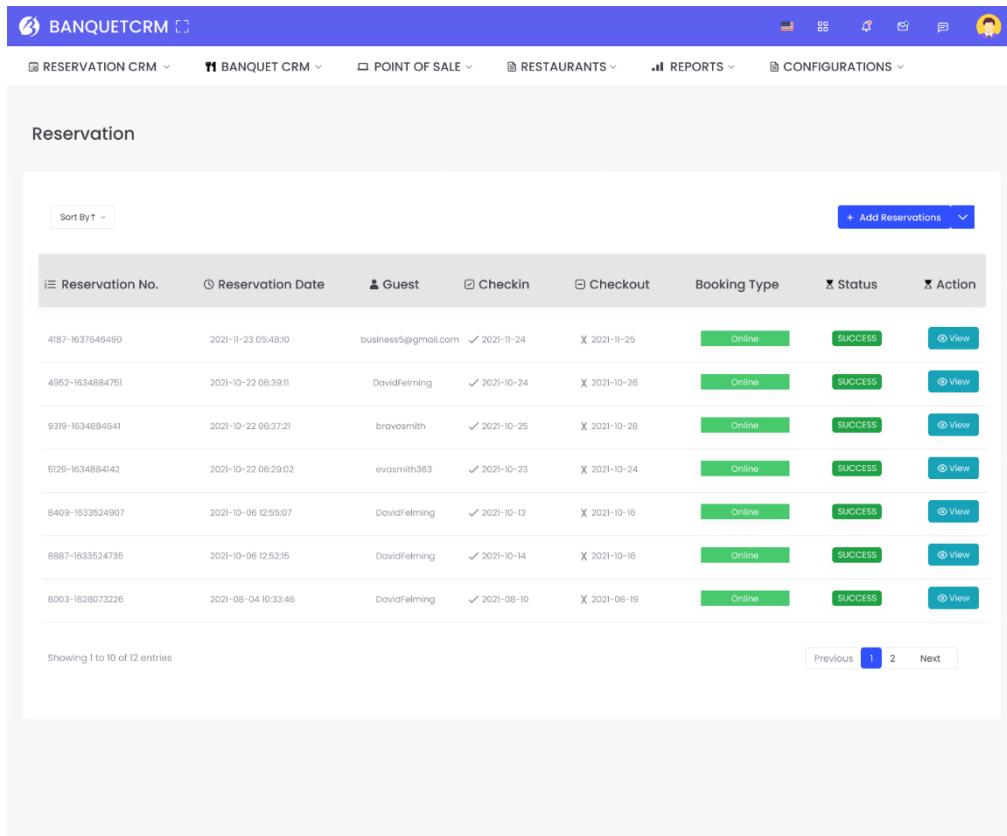

Legend: Online (Blue Diamond), Offline (Red Diamond)

Timeline: 2022-01 to 2022-12

The chart shows a constant number of new bookings per month, with approximately 10 online and 10 offline bookings each month.

Fig 6.15 Dashboard – footer 5

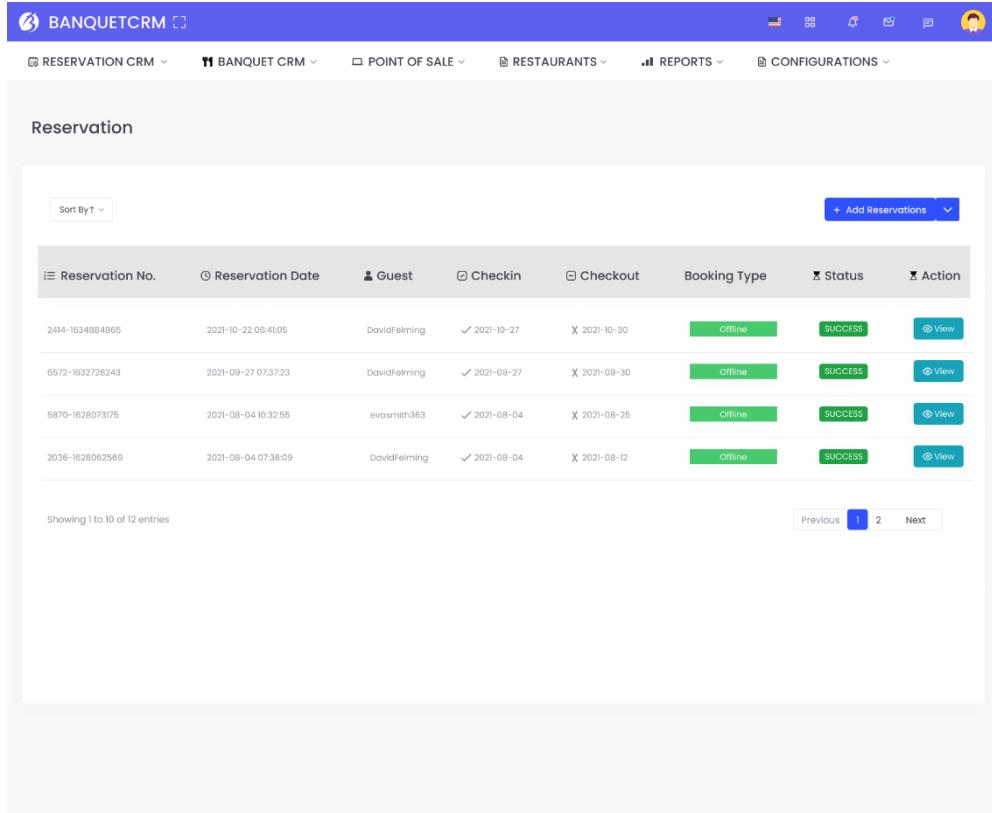

RESERVATION CRM:

The screenshot shows the 'Reservation' section of the BANQUETCRM interface. At the top, there are navigation links: RESERVATION CRM, BANQUET CRM, POINT OF SALE, RESTAURANTS, REPORTS, and CONFIGURATIONS. Below the header is a search bar labeled 'Reservation'. A table lists 12 entries of online reservations. The columns are: Reservation No., Reservation Date, Guest, Checkin, Checkout, Booking Type, Status, and Action. Each entry includes a green 'Online' button under 'Booking Type' and a green 'SUCCESS' button under 'Status'. The 'Action' column contains a blue 'View' button. At the bottom of the table, it says 'Showing 1 to 10 of 12 entries' and has navigation buttons for 'Previous', '2', and 'Next'.

Fig 6.16 Online reservation

The screenshot shows the 'Reservation' section of the BANQUETCRM interface. At the top, there are navigation links: RESERVATION CRM, BANQUET CRM, POINT OF SALE, RESTAURANTS, REPORTS, and CONFIGURATIONS. Below the header is a search bar labeled 'Reservation'. A table lists 12 entries of offline reservations. The columns are: Reservation No., Reservation Date, Guest, Checkin, Checkout, Booking Type, Status, and Action. Each entry includes a green 'Offline' button under 'Booking Type' and a green 'SUCCESS' button under 'Status'. The 'Action' column contains a blue 'View' button. At the bottom of the table, it says 'Showing 1 to 10 of 12 entries' and has navigation buttons for 'Previous', '1', '2', and 'Next'.

Fig 6.20 Staff information

The screenshot shows the 'Rooms' section of the BANQUETCRM application. The layout is similar to the Staff page, with a navigation bar at the top and a table below. The table columns are Room Number, Room Type, Floor no, Status, and Actions. The table lists rooms such as '10' (Standard Room - 2 Double Beds, Floor 1, Active), '14' (Family Room - 1 Double Bed, 1 Queen Bed, Floor 1, Active), '6' (Standard Room - 1 Double Bed, Floor 1, Active), '14' (Standard Room - 2 Double Beds, Floor 1, Active), and '222' (President Suits - Luxurious, Floor 2, Active). Each room entry has edit and delete icons in the Actions column. The bottom of the page shows 'Showing 1 to 10 of 12 entries' and a pagination control.

Fig 6.67 Function and events

The screenshot shows the BANQUETCRM software interface. The top navigation bar includes links for RESERVATION CRM, BANQUET CRM, POINT OF SALE, RESTAURANTS, REPORTS, and CONFIGURATIONS. The main content area is titled "Ticket" and displays a list of entries. The columns in the table are Name, Event, Ticket, Price, Status, and Option. The table shows three entries: Palmer, SHUBHAM RAW HOUSE, and Parom. The status for Palmer is "Confirmed", while Parom is "Pending". The sidebar on the left provides quick access to Reservations, Guest Info., Room Type, and various BANQUET and POS-related functions.

Fig 6.68 Ticket

The screenshot shows the BANQUETCRM software interface. The top navigation bar includes links for RESERVATION CRM, BANQUET CRM, POINT OF SALE, RESTAURANTS, REPORTS, and CONFIGURATIONS. The main content area is titled "Contact Details" and displays a booking form. The form is divided into two tabs: "Booking Details" and "Clients Details". Under "Booking Details", there are fields for Events (Party), Tickets Quantity, Sub Total, Tax, Total, Deposite, Payment Method (Cash), and Status (Confirmed). The sidebar on the left provides quick access to Reservations, Guest Info., Room Type, and various BANQUET and POS-related functions.

Fig 6.69 Sell ticket – booking details

The screenshot shows the BANQUETCRM software interface. On the left, there's a sidebar with various shortcuts like Reservations, Guest Info., Room Type, etc. The main area is titled 'Contact Details' and contains two tabs: 'Booking Details' and 'Clients Details'. Under 'Clients Details', there are sections for 'Golden Ticket' (Guest #1, Guest #2, Guest #3) and 'Ticket Buyer' (Title, Name, Email, Phone, Address, Country, State, City, Zipcode). At the bottom are 'Save' and 'Cancel' buttons.

Fig 6.70 Sell ticket – client details

The screenshot shows the BANQUETCRM software interface. The top navigation bar includes 'RESERVATION CRM', 'BANQUET CRM', 'POINT OF SALE', 'RESTAURANTS', 'REPORTS', and 'CONFIGURATIONS'. Below the navigation is a 'Todo' section with a 'TO DO LIST' and a '+' button.

Fig 6.71 Todo

The screenshot shows the BANQUETCRM software interface. The top navigation bar includes 'RESERVATION CRM', 'BANQUET CRM', 'POINT OF SALE', 'RESTAURANTS', 'REPORTS', and 'CONFIGURATIONS'. Below the navigation is a 'Meeting' section with a table header: Date, Call Note, Function, Call Duration, Customer/Personal, Main Staff, Option. There's also a 'Sort By ↑' dropdown and a 'Search...' input field. At the bottom, it shows 'Showing 1 to 10 of 12 entries' and navigation buttons for 'Previous', '2', and 'Next'.

Fig 6.72 Meetings

The screenshot shows the BANQUETCRM software interface with a blue header bar. The header includes the BANQUETCRM logo, a search bar, and navigation links for RESERVATION CRM, BANQUET CRM, POINT OF SALE, RESTAURANTS, REPORTS, and CONFIGURATIONS. On the far right of the header is a user profile icon.

The main content area is titled "Create Meeting". It contains several input fields and dropdown menus:

- Meeting Subject:** A text input field labeled "Subject".
- Company Name:** A text input field labeled "Name".
- COMPANY / PERSONAL ATTENDEES:** A dropdown menu showing "JESSICA JONSON (TOLL BROTHERS)".
- Main Staff:** A dropdown menu showing "David Felming".
- STAFF ATTENDEES:** A dropdown menu showing "DAVID FELMING".
- Location:** An input field with a placeholder "Location".
- Starting Time:** A date and time input field with a calendar icon.
- Ending Time:** A date and time input field with a calendar icon.
- Meeting description:** A large text area for meeting notes.
- Privacy:** A dropdown menu showing "All Days".
- Show Time as:** A dropdown menu showing "True".

At the bottom of the dialog box are three buttons: "OK", "Back", and "Cancel".

On the left side of the interface, there is a sidebar with various shortcut icons grouped under sections like "RESERVATION SHORTCUTS", "BANQUET SHORTCUTS", and "POS SHORTCUTS".

Fig 6.73 Create meeting

The screenshot shows the BANQUETCRM software interface with a blue header bar. The header includes the BANQUETCRM logo, a search bar, and navigation links for RESERVATION CRM, BANQUET CRM, POINT OF SALE, RESTAURANTS, REPORTS, and CONFIGURATIONS. On the far right of the header is a user profile icon.

The main content area is titled "Call". It displays a table of call entries with the following columns:

Date	Call Note	Call Duration	Customer/Personal	Option
Showing 1 to 10 of 12 entries				

At the top right of the table is a blue button labeled "+ Create Call". At the bottom right of the table are navigation buttons for "Previous", "Next", and page numbers (1, 2).

The screenshot shows the BANQUETCRM software interface with a blue header bar. The header includes the BANQUETCRM logo, navigation links for RESERVATION CRM, BANQUET CRM, POINT OF SALE, RESTAURANTS, REPORT, and CONFIGURATIONS, and various system icons. On the left, there is a sidebar with sections for RESERVATION SHORTCUTS (Reservations, Guest info., Room type) and BANQUET SHORTCUTS (Calender, Sales, Functions, Tasks, Reports). The main content area is titled "Add Customer Groups". It contains fields for "Customer Group Name *" (with placeholder "Customer group name") and "Calculation Percentage (%)" (with placeholder "Calculation percentage (%)" and a numeric input field). At the bottom are "Save" and "Reset" buttons.

CHAPTER 7: TESTING

7.1 TESTING PLAN

The Objective of the system testing is to ensure that all individual functions are working as expected, that the flow of the website link together to meet the requirements specified and it has no errors. User interface (UI) testing is a type of testing in which testers need to make sure that all buttons, fields, labels, and other items on the screen work as specified. UI testing involves checking screens with controls, such as toolbars, colors, fonts, sizes, buttons, icons, etc., and how they respond to the user input. Apart from this, navigation is also main function of the site. All the pages including their subsection is in the flow like an interactive website. Therefore, all designs have prototyping which connect different pages together. The main moto of our working is to do improvements and make website work thoroughly for all new releases and builds.

7.2 TESTING STRATEGY

Once design with prototyping has been done, it must be tested to uncover as many errors as possible before delivery to customers. Our goal is to design a series of test cases that have a high likelihood of finding errors. In agile methodology, every iteration ended with the testing phase and the errors discovered in the testing phase became the priorities of development in the next phase.

7.3 TEST SUITE DESIGN

To minimize the number of errors in software, a rich variety of test design methods has evolved for software. These test cases provide the developer with a systematic approach to testing.

7.3.1 Test Cases

Table 7.1 Test Cases

Test Id	Test Condition	Expected Output	Actual Output	Remark
1	Size (width, height, spacing), position & color of the elements	As needed	As needed	PASS
2	Font whether it is readable or not	Readable	Readable	PASS
3	Scrollbars according to the size of the page if any	Scrollable	Scrollable	PASS
4	Buttons Should be Clickable	Clickable	Clickable	PASS
5	Navigation throughout the site	All pages should be changed	All pages are changed	PASS
6	Checkbox should be working	Workable	Workable	PASS
7	No Grammar and Spelling Errors.	No Errors	No Errors	PASS
8	Status Button should be changed when clicked	Button should be toggle	Button is toggle	PASS
9	Calendar and time selection open	Selection menu open	Selection menu open	PASS
10	Pagination should be working	Pages should be changed	Pages are changed	PASS

CHAPTER 8: CONCLUSION AND DISCUSSION

8.1 SELF ANALYSIS OF PROJECT VIABILITIES

The website had been redesigned and updated based on the current UI trends and keeping the UX research together. The software is very effective and useful as it has new features that are not as supported by any website that are live in market. The website provides different dashboards, reports, numerable add details forms, an incident response and integration with staff and guest information to give users visibility into system. Hence, the system is more efficient and user friendly with features.

8.2 PROBLEM ENCOUNTERED AND POSSIBLE SOLUTIONS

During the initial phase of the internship, the designs had few limitations like selection of various typography, colors and designing of charts and icons. Hence, we took up a course which is suggested by our guide on UI/UX Design principles to understand the basics of design.

Other issues faced was the interactive form components. After searching a lot on internet, we came up with one YouTube video which guild us to create interactive checkbox, radio button and dropdown menu for the developing project but still we did not find out input field with user interaction.

8.3 SUMMARY OF PROJECT WORK

In conclusion, we learnt many technologies and how we can use them for our work in project. We have tried to use UI/UX and kept the design simpler and more impactful with creativeness to make this ‘Hotel Booking Software’ more user friendly. It includes all the details designs, features and easy-to-use function of the website. The main objective of the project on this system is to manage the details of room, customer, reservations, food, amenities and payments.

CHAPTER 9: LIMITATION AND FUTURE ENHANCEMENT

9.1 LIMITATIONS

- There are only few transactions mode.
- Hotel is just provided information related to rooms and booking.
- All the details are in English language.
- UI is not standard for web and mobile app

9.2 FUTURE ENHANCEMENT

- We will provide facility to do payments from different transaction mode.
- Hotel will provide more benefits to users like pick up facility, Ayurveda center details for health benefit and kids play arena.
- A chat facility will be added with multiple languages.
- Interactive Input field can be added.
- Explore new platforms for website design and development.
- Mobile app design for Android and IOS.
